

ABOUT ME

Frontend Engineer with experience building internal business systems and public-facing applications using React.js, Next.js, and TypeScript. Experienced in frontend architecture, state management, REST API integration, reusable components, and responsive UI development. Comfortable working closely with product and backend teams to translate business requirements into maintainable, production-ready features, while continuing to expand my full-stack development skills.

EXPERIENCE

Taiwan Mobile — QA Automation

July 2026 – October 2026 | Remote

- Developed and maintained mobile and web E2E automation using Maestro and Playwright, including test flow development, UI inspection, debugging, and regression testing.
- Built AI-assisted QA automation workflows to support test analysis, automation development, debugging, and reporting.

PT Propadu Konair Tarahubun — Frontend & Mobile Engineer

January 2025 – January 2026 | North Sumatera, Indonesia

- Developed internal business systems and public-facing web applications using React.js, Next.js, and TypeScript, with reusable UI components and structured state management using Zustand and React Query.
- Integrated frontend applications with REST APIs, handling server state, data fetching, loading states, and API responses using React Query.
- Collaborated with product and backend teams to translate business requirements into maintainable, production-ready features.

PT Taqnia Utama — Frontend Web Engineer

January 2022 – December 2024 | North Sumatera, Indonesia

- Developed enterprise web applications using React.js and TypeScript, implementing structured state management with React Query and reusable UI patterns.
- Designed maintainable frontend architecture using reusable components, service-layer patterns, and separation of concerns, with focus on performance and production stability.

PT Cipta Kerja Arunika Nusantara — Mobile Application Developer

January 2019 – December 2021 | North Sumatera, Indonesia

- Built Android native applications using Kotlin with MVVM architecture, managing UI state using ViewModel + LiveData.
- Handled asynchronous operations using Kotlin Coroutines and ensured application stability through deployment to Google Play Store.

EXPERTISE

Frontend:

React.js, Next.js, TypeScript, JavaScript, HTML, CSS, and TailwindCSS

State & Data:

React Query, Zustand, Redux

API & Backend:

REST API, Axios, Node.js

Mobile:

Flutter, React Native, Kotlin

Tools:

Git, GitLab, Playwright, Maestro, Swagger, Docker, Jira, CI/CD

EDUCATION

Bachelor of Informatics Engineering

STMIK IBBI MEDAN 2015 – 2019

SELECTED PROJECT

LapakBenz — Vehicle Marketplace

React.js / Next.js / TypeScript

- Developed frontend interfaces and product flows for a vehicle marketplace.
- Integrated frontend features with backend APIs and collaborated with the backend team on application delivery.

RavaSIM — eSIM Marketplace Prototype

Next.js / TypeScript / React Query / Zustand

- Built a responsive eSIM marketplace prototype focusing on frontend architecture, reusable components, and state management.
- Implemented product flows using mock data to simulate marketplace interactions.

LANGUAGE

- Indonesia
- English – Professional Working Proficiency
