PROFILE

Engineer with seven years across web, mobile, and internal operations products. I build maintainable interfaces with React, Next.js, Flutter, and Kotlin, and automate critical web and mobile journeys with Playwright and Maestro.

EXPERIENCE

Taiwan Mobile - QA Automation

March 2026 - September 2026 | Remote

Built and maintained end-to-end mobile and web tests with Maestro and Playwright. Investigated failures across application, backend, and environment layers; created reusable flows and AI-assisted QA workflows.

PT Propadu Konair Tarahubun - Frontend & Mobile Engineer

January 2025 - January 2026 | North Sumatra, Indonesia

Built public and internal web applications with React, Next.js, and TypeScript, plus field-facing Flutter applications. Established reusable UI and state patterns across product modules.

PT Taqnia Utama - Frontend Web Engineer

January 2022 - December 2024 | North Sumatra, Indonesia

Developed enterprise React and TypeScript interfaces. Structured reusable components, service boundaries, and data fetching patterns for maintainable product modules.

PT Cipta Kerja Arunika Nusantara - Mobile Application Developer

January 2019 - December 2021 | North Sumatra, Indonesia

Built native Android applications in Kotlin with MVVM and Coroutines, including a job marketplace released on Google Play.

SELECTED WORK

LapakBenz - Vehicle marketplace

React, TypeScript, Vite, React Query, Zustand

Built catalog, checkout, merchant, and event journeys and a static HTML pipeline for shareable product and event pages. Public source and demo are linked from the portfolio.

RavaSIM - eSIM frontend prototype

Next.js, TypeScript, React Query, Zustand

Built package, checkout, and eSIM management journeys against a mock service layer. This is a frontend prototype, not a live transaction system.
